

Post-Secondary Space Planning

INSPIRATION GUIDE

Solutions for every generation.™

Collaborative learning spaces for the digital generation.

To create the best learning and teaching experiences possible, you need adaptable, durable furniture that can meet the dynamic needs of today's digital learners. For over 25 years, we've worked with post-secondary institutions across Alberta to create interior spaces that inspire tomorrow's leaders and evolve with the latest technological trends.

Let's discover how we can reimagine your learning and work spaces.

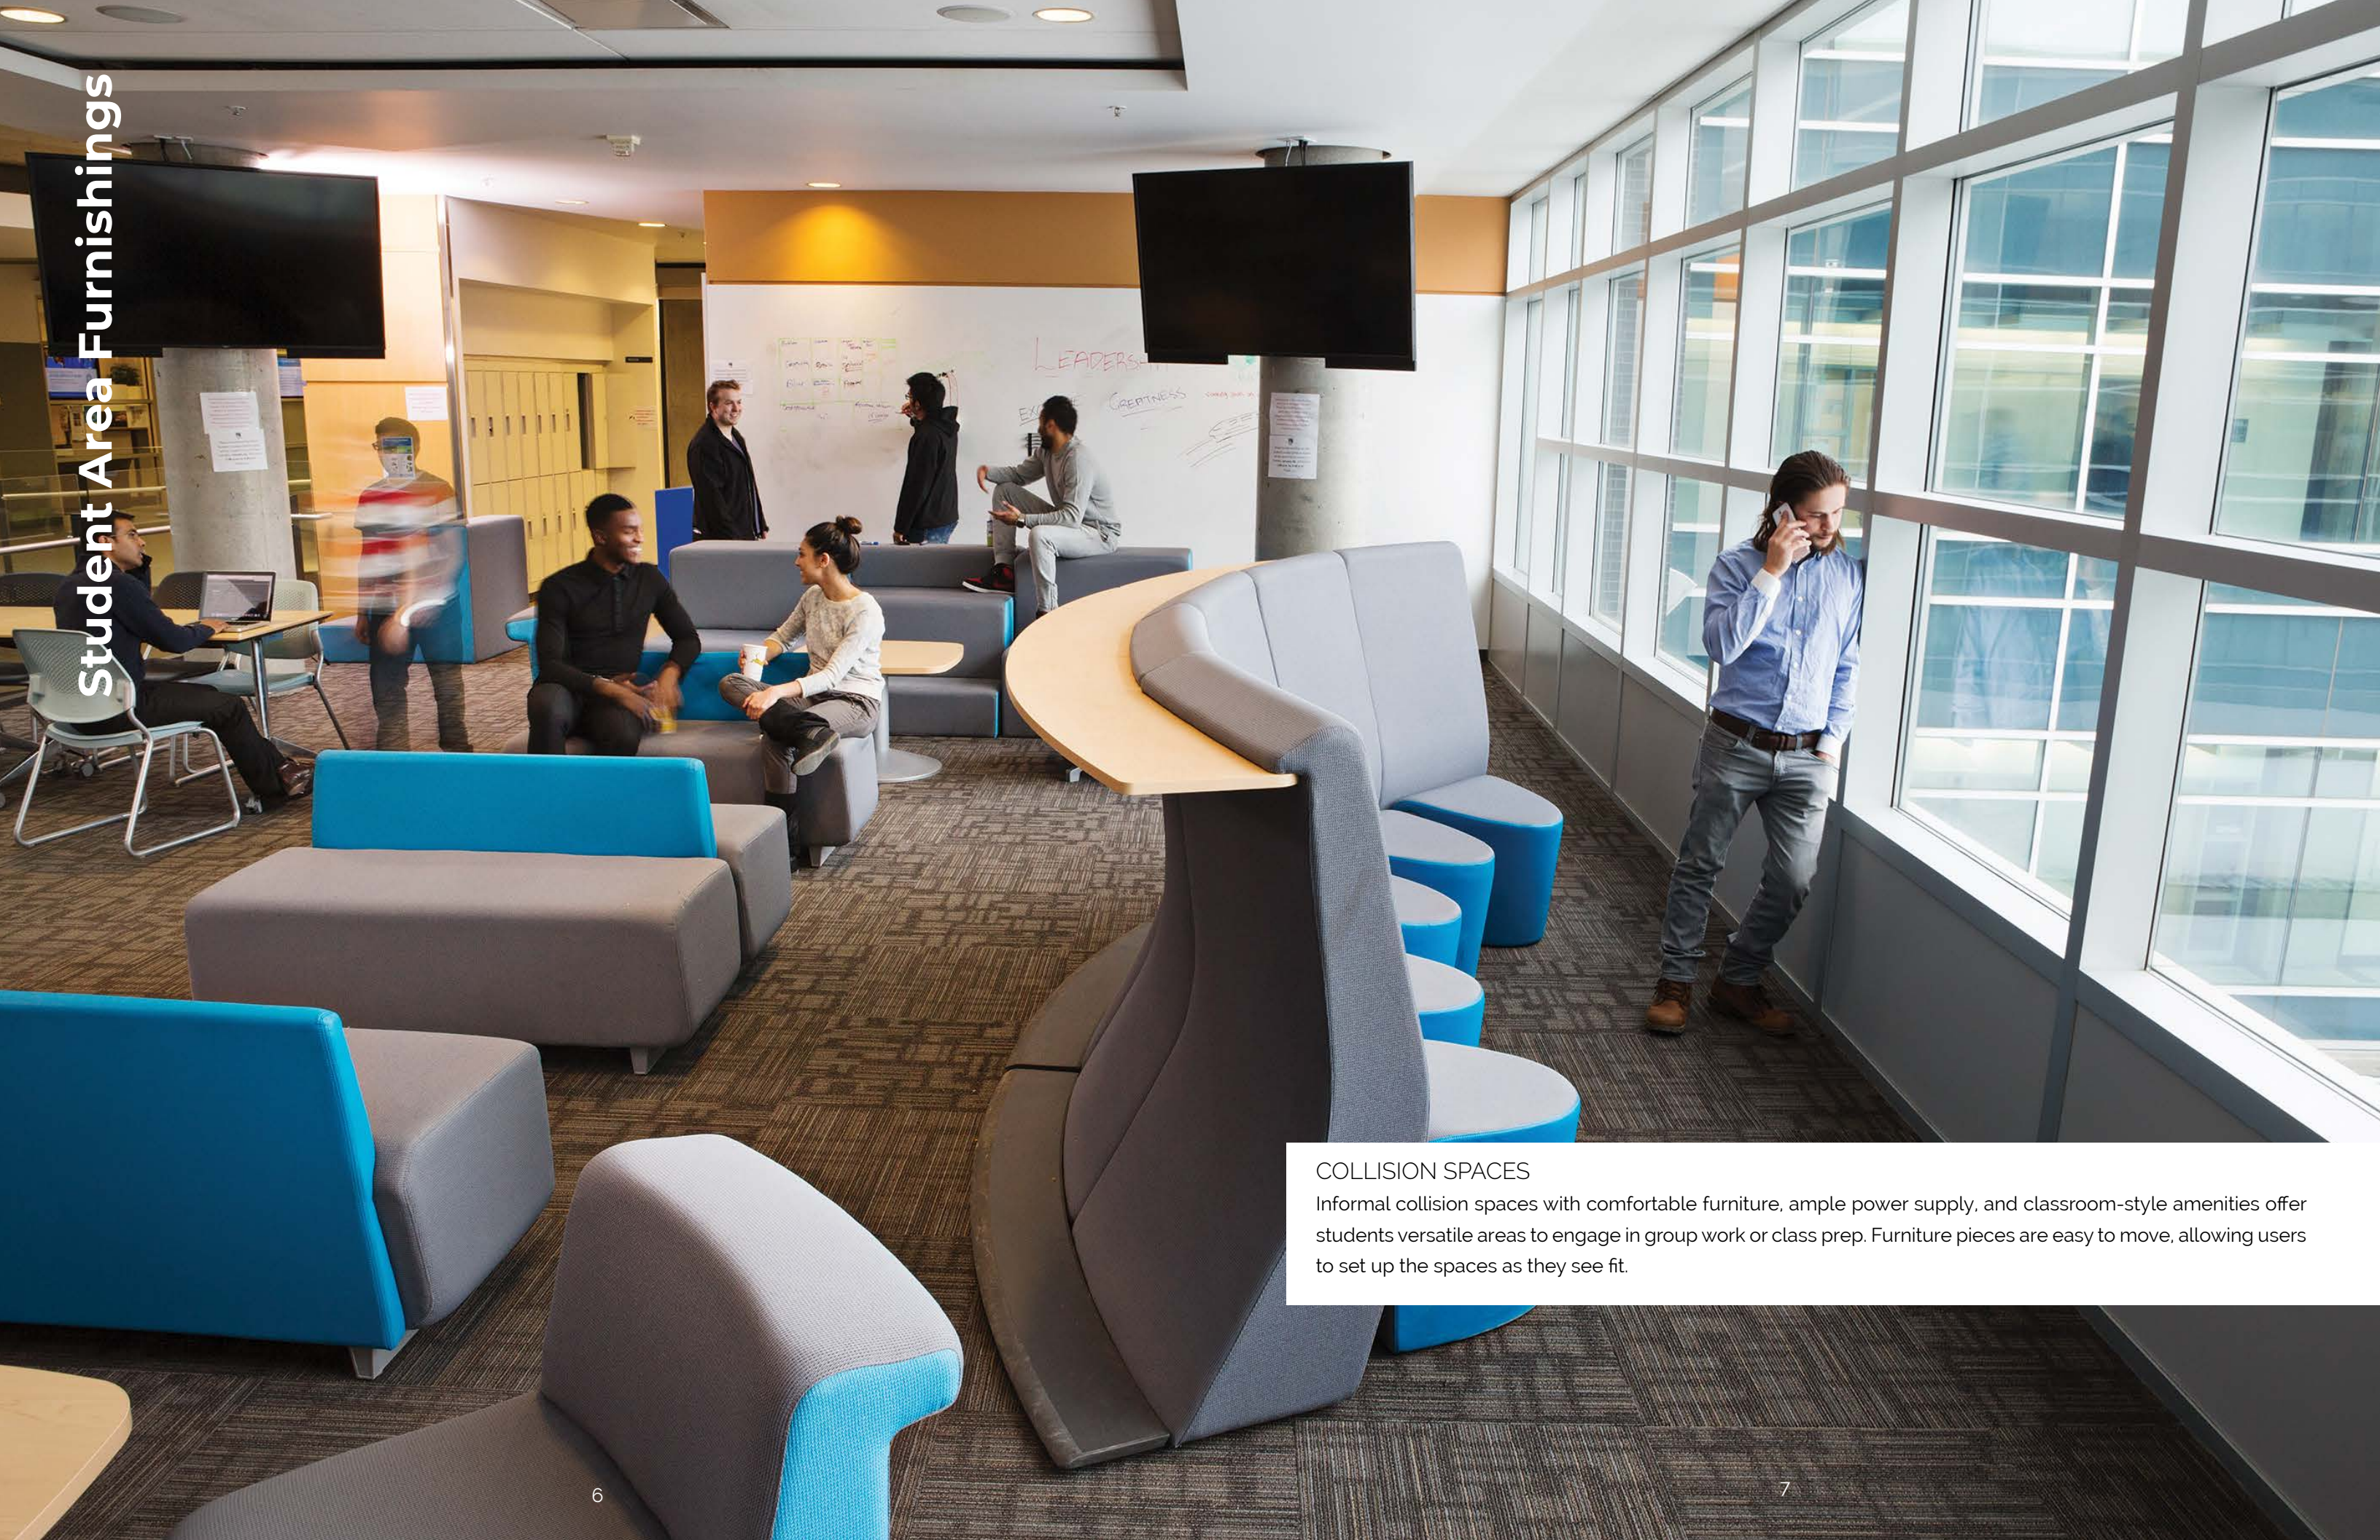

Table of Contents

STUDENT AREA FURNISHINGS

Private & Open Staff Workstations	12
Meeting & Conference Rooms	14
LEARNING AREAS	
Lecture Rooms	16
Digital Learning Spaces	18
Collaborative Classrooms	20
Our “3D” Approach	22

PRIVATE CUBICLES & "ALONE TOGETHER" WORKSTATIONS

Providing students with workspace options that suit their needs. Private cubicles offer areas for quiet reflection and are suitable for focused studying. "Alone Together" workstations with convenient laptop tables and built-in plugins deliver similar benefits while allowing students to feel visually connected to their peers.

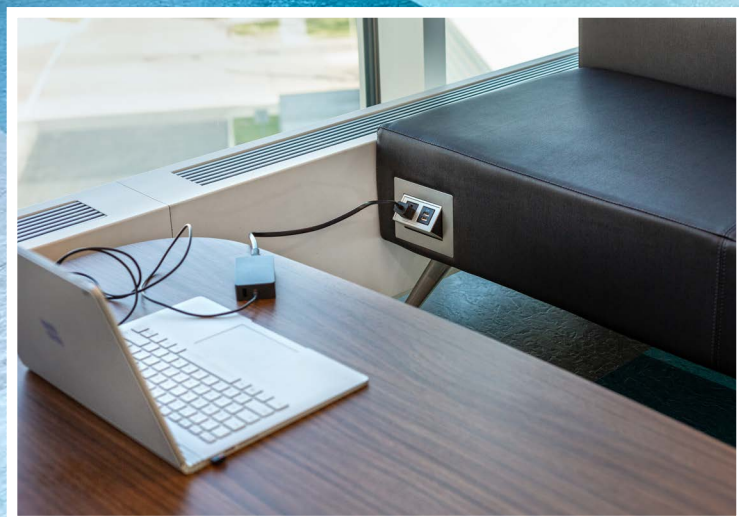

COLLISION SPACES

Informal collision spaces with comfortable furniture, ample power supply, and classroom-style amenities offer students versatile areas to engage in group work or class prep. Furniture pieces are easy to move, allowing users to set up the spaces as they see fit.

COMMON AREA SOFT SEATING

Contemporary semi-enclosed designs with options for built-in power and USB connections are ideal for group work and open team collaboration in relaxed settings. Built-in power and USB connections provide extra convenience and ensure that devices stay powered and able to complete the tasks at hand.

OUTDOOR SEATING

Comfortable and inviting outdoor furniture encourages students and staff to make the most of outdoor spaces all year round. Lightweight and durable materials are built to last in Alberta's variable four-season climate and function in all weather conditions.

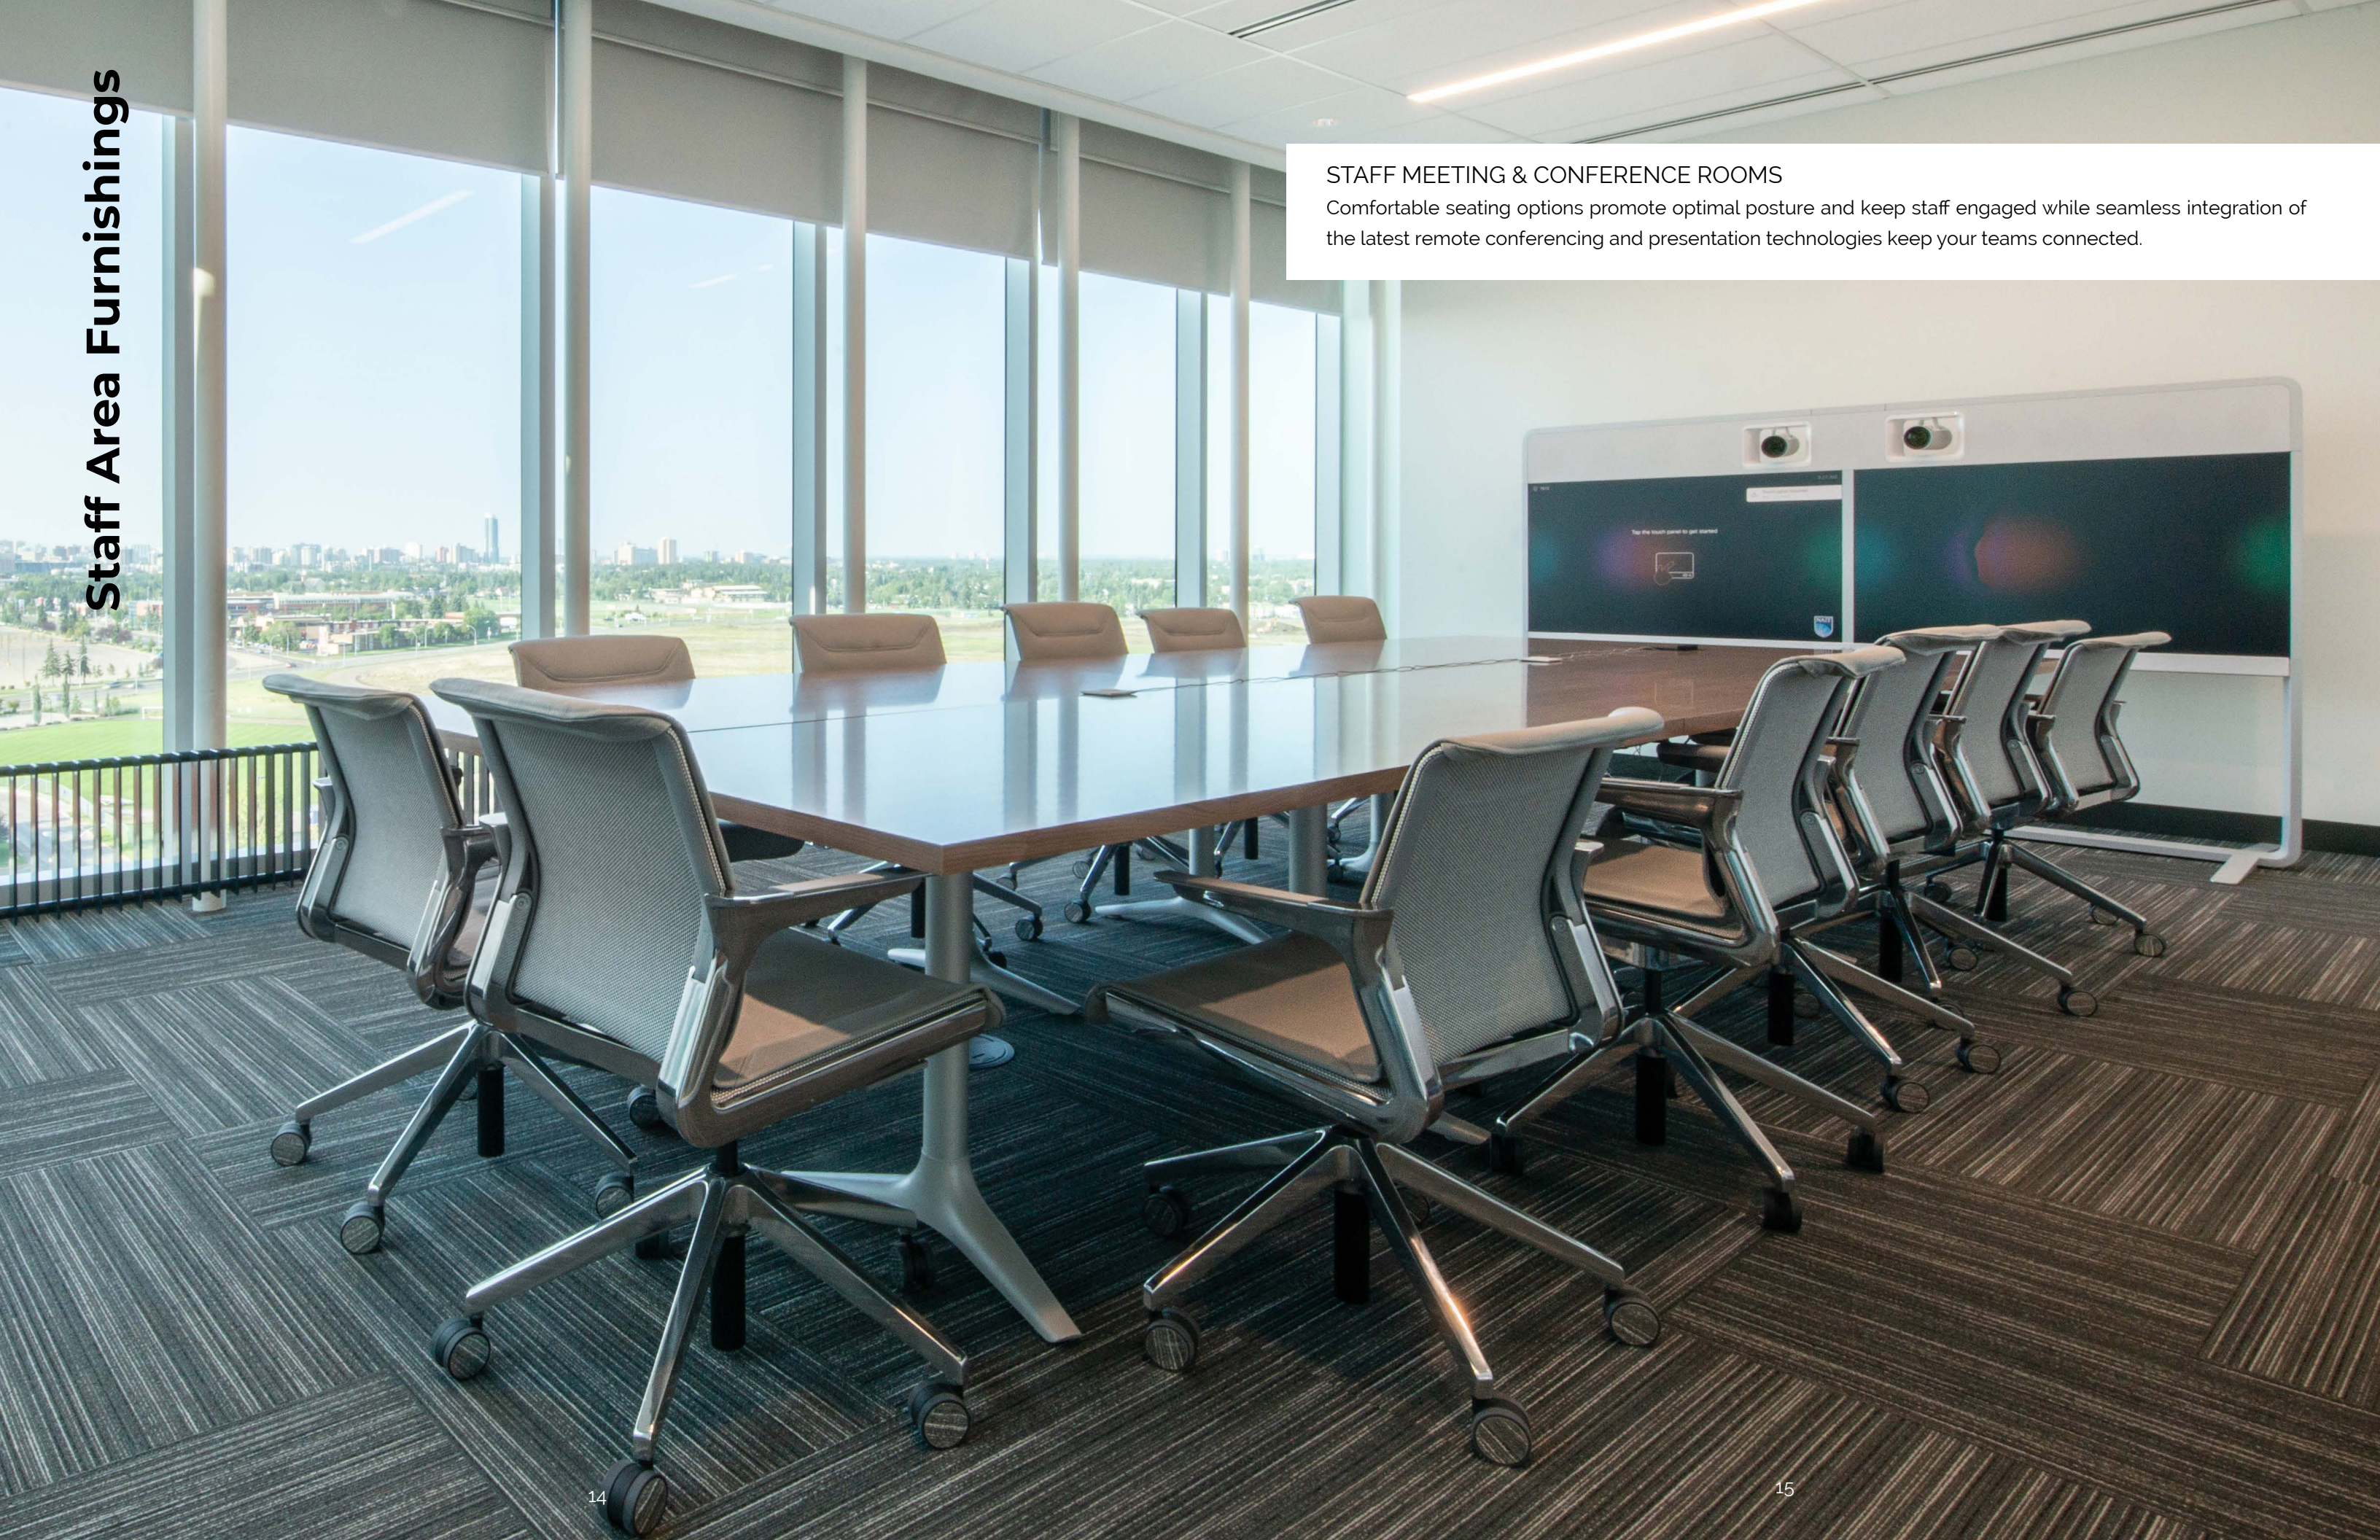

PRIVATE & OPEN STAFF WORKSTATIONS

Contemporary open workstations balance visual and acoustic privacy with collaboration, creativity, and functional design, while modern private work spaces built using the latest modular construction methods provide areas for focused work in acoustically sealed areas without isolating users from the rest of the office.

STAFF MEETING & CONFERENCE ROOMS

Comfortable seating options promote optimal posture and keep staff engaged while seamless integration of the latest remote conferencing and presentation technologies keep your teams connected.

LECTURE ROOMS

Durable, lightweight furniture with convenient built-in power supply is easily movable and supports multiple configurations, including instructor-focused lectures, group learning, and team collaboration.

DIGITAL LEARNING

Purpose-built furniture seamlessly supports the latest technological innovations while concealing cables and cords from view. Workstations are designed for both comfort and productivity, allowing students to work for short bursts or extended timeframes.

COLLABORATIVE CLASSROOMS

The emergence of collaborative classrooms reflects a paradigm shift that offers flexibility in how students receive information. The shift moves instructors away from a position of authority at the front of the classroom and places them amongst students at different positions within the classroom.

About CDI Spaces

CDI Spaces is a trusted thought leader in Alberta’s workspace furnishings industry. We are known for our consultative and collaborative approach.

We consult with decision makers and tailor space solutions for K – 12 schools, post-secondary institutions, government, and corporate offices across Alberta. Drawing from our decades of expertise and our understanding of how individuals work, learn, and collaborate throughout every phase of their growth and development, we provide **Solutions for every generation.™**

Our “3D” Approach

We call our company’s unique outcome-based approach our “3D” philosophy. We think in terms of the outcomes our clients would like to achieve, and then determine the actions required to achieve them. Our “3D” Approach involves three steps:

STEP ONE: DISCOVER

In this step, we understand your company’s purpose, goals, and the desired outcome for that space.

STEP TWO: DESIGN

We consider design a hands-on partnership. There are designers who create a space solely for their personal taste, while others tend to over-design a space. We work together with our clients to create the best design possible. We balance creativity and functionality, ensuring we have the right mix that fits the needs of your organization.

STEP THREE: DELIVER

CDI Spaces is committed to providing an easy and enjoyable delivery process. We ensure a complete installation with a dedicated project management team that is committed to delivering your furniture on schedule with minimal disruption.

How can we help you?

Let’s have a brainstorming session to discover what you want to accomplish for your learning and work spaces.
